Effects of Age on Eyewitness Identification in Police Lineups

Christy Fic

Shippensburg University of Pennsylvania
Abstract

This paper explores the effects of age on eyewitness identification in police lineups as reported in six published articles. The authors of these articles all question the accuracy of eyewitness identification in general. However, …..

*Keywords:* eyewitness identification, age effects, free-recall
Effects of Age on Eyewitness Identification in Police Lineups

Many psychologists have studied the effects of age on accuracy.

**Accuracy**
